Mohammad Jawad Barati

Software Engineer | Backend/Fullstack Engineer | Microservices |
TS/JS | NodeJS | Python | IaC | AWS | TDD | Automation | CI/CD
Bremen, Bremen, Germany

Summary

Backend Software Engineer with experience designing distributed systems, cloud-native applications, and developer platforms. Skilled in TypeScript, Python, Node.js, NestJS, GraphQL, MongoDB, PostgreSQL, Docker, Terraform, AWS, and OpenTelemetry. Passionate about software architecture, event-driven systems, observability, automated testing, and continuously improving engineering practices.

Experience

Korial

Cloud Backend Engineer

January 2025 - August 2026 (1 year 8 months)

Darmstadt

- Led the design and implementation of an event-driven production workflow, replacing a synchronous integration approach and helping reduce technical debt while improving service autonomy.
- Led the migration of a business-critical feature between services, improving ownership boundaries and providing valuable insights that informed subsequent architectural refactoring efforts.
- Designed and implemented a proof of concept using RabbitMQ, applying Outbox and Inbox patterns to evaluate fault-tolerant asynchronous communication.
- Strengthened software delivery quality by promoting automated testing practices and implementing Jenkins pipeline guardrails that helped identify issues earlier in the development lifecycle.
- Collaborated to shape & evolve GraphQL APIs with a strong focus on developer experience, usability, and performance while considering their impact on database efficiency and scalability.

RYTLE

Full Stack Developer

July 2023 - April 2024 (10 months)

Bremen, Germany

- Applied Test-Driven Development (TDD) to improve code quality and facilitate predictable deployments.
- Identified and removed duplicated business logic by introducing reusable abstractions and shared interfaces.
- Designed and implemented performant RESTful APIs focusing on scalability, idempotency, and real-world client usage patterns. Advocated for standards-compliant API design by leveraging HTTP semantics and RFC guidelines to improve consistency, reliability, and developer experience.

ClimatePartner

Software Engineer

December 2022 - March 2023 (4 months)

Munich

- As the security champion for my team, I took ownership of ensuring the safety of our software.
- Collaborated closely with product and engineering teams to quickly gain domain knowledge and contribute effectively to climate-focused software solutions.
- Provided technical guidance on MongoDB data modeling and query optimization, helping improve the team's understanding and usage of the database.

Spad

6 months

Software Engineer

July 2022 - August 2022 (2 months)

Mashhad, Khorasan, Iran

- Researched, and learned Ansible in order to configure servers smoothly and automate tedious tasks.
- Developed the backend for a ticketing system and an apartment booking, and then collaborated with frontend engineers to deliver best possible UI/UX.

Backend Developer

March 2022 - June 2022 (4 months)

Razavi Khorasan Province, Iran

- Successfully configured an Ubuntu server and Nginx, enabling smooth deployment and maintenance of web applications.
- Developed a custom wrapper for Partocrs in NestJS, making it easier for us to work with Partocrs.

- Engaged in technical discussions with my team lead and my peer devs to stay in touch with the new technologies and ways of doing things.

Salamsakhteman.com

Backend Developer

January 2021 - March 2022 (1 year 3 months)

Mashhad

- Developed a matchmaking system, which relieved the sales team of a tedious task; finding the right cabinetmaker for each customer based on the parameters they had.
- Refactored a large portion of the codebase from JavaScript to TypeScript, contributing approximately 40% of the migration effort.
- Advocated for adopting NestJS, helping modernize the backend stack and improve maintainability.

Andishe Gostar Rahayافت Raha

Web Developer

September 2020 - December 2020 (4 months)

Qom, Iran

- Implemented the Auth module for an ECommerce web app with the help of my senior team lead.
- Engaged in system analysis and design, contributing to the development of the software.
- Conducted a Proof of Concept for full-text search in PostgreSQL, showcasing my problem-solving skills and ability to identify and evaluate potential solutions.
- Close collaboration with other colleagues in order to complete tasks and tickets.

ArianaCloud

Backend Engineer and co-founder

August 2019 - August 2020 (1 year 1 month)

Qom Province, Iran

- Designed, analyzed, and eventually developed the MVP web application for a Platform as a Service provider.
- Collaborated closely with our SysAdmin to utilize Docker and its automation capabilities, enabling us to grasp the requirements and having a clearer picture of our needs.
- Collaborated and on-boarded our new frontend developer to enhance UI's beauty.

Education

Institute of Applied Science Technology Jahad Daneshgahi

Bachelor's degree, Information Technology · (2017 - 2019)

Islamic Azad University

Associate's degree, Computer Software Engineering · (2014 - 2016)
